Published

Factory Management — Create a Factory

Add a factory profile with its location, scale, equipment and certificates, so you can link it to suppliers, products and inspections.

Mixed. The reviewed create path and the readonly Overview and empty Certificate tab are current UI verified. Edit, rating, notes, and import are source-only and not dev-verified.

Source and verification

Do not mark this whole module unverified. Source: QMAS Help Center — Manage your QMAS Factory Compliance Profile, last edited 2026-01-16 16:11:21 HKT. The article was not marked Updated November 2026.

- Manage your QMAS Factory Compliance Profile (last edited 2026-01-16 16:11:21 HKT). Create path and reviewed profile screens are current UI verified. Edit, import, rating, and notes are source-only, not dev-verified.

Help Center home: QMAS Help Center (last edited 2026-01-20 13:54:13 HKT). User Guide index: User Guide (last edited 2026-01-16 15:44:49 HKT). Public icw-io addresses for individual articles were not verified, so those links use app.notion.com.

Screenshot slots: 7 reviewed and 3 pending privacy review.

- 1. Open the Factory tab
- 2. Factory Profile — overview
- 3. Factory Profile — scale and equipment (optional)
- 4. Factory Profile — contact
- 5. Classification (optional)
- 6. Certification (optional)
- 7. Done — factory profile

Overview

1. Open **Supplier / Factory Management**, click the **Factory** tab, then **Create Factory**.
2. **Factory Profile**: overview, scale, equipment and contact.
3. **Classification** (optional): product category and tags.
4. **Certification** (optional): add audit reports or certificates, then click **Done**.
5. The factory profile opens.

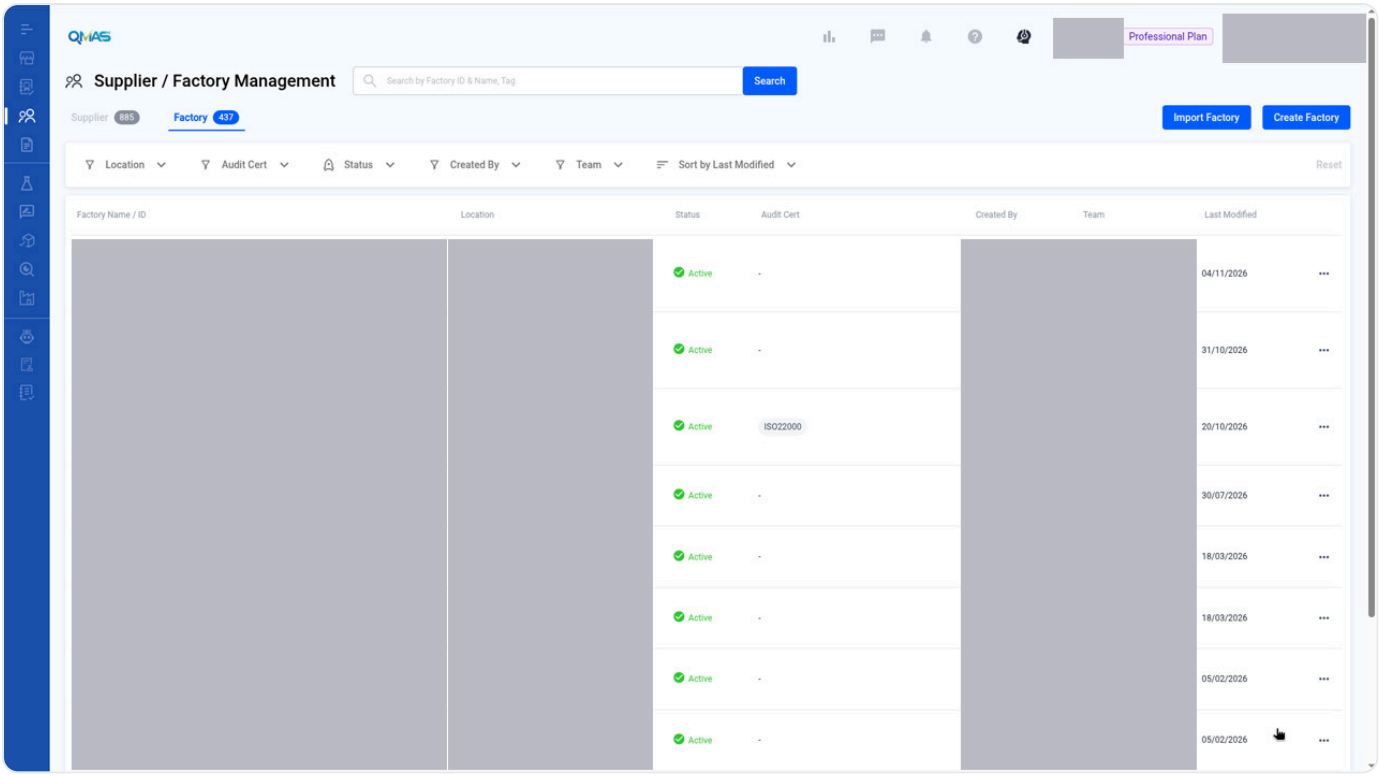

Module	Supplier / Factory Management
Start here	https://qmas.icw.io/supplier-manager/suppliers → **Factory** tab → **Create Factory**
Direct link	https://qmas.icw.io/supplier-manager/factory/create
Steps	1 Factory Profile → 2 Classification → 3 Certification → Done
Checked against	QMAS dev, 4 Nov 2026

Step-by-step

1. Open the Factory tab

In the left menu, open **Supplier / Factory Management** and click the **Factory** tab. It lists your factories with location, status and audit certificates.

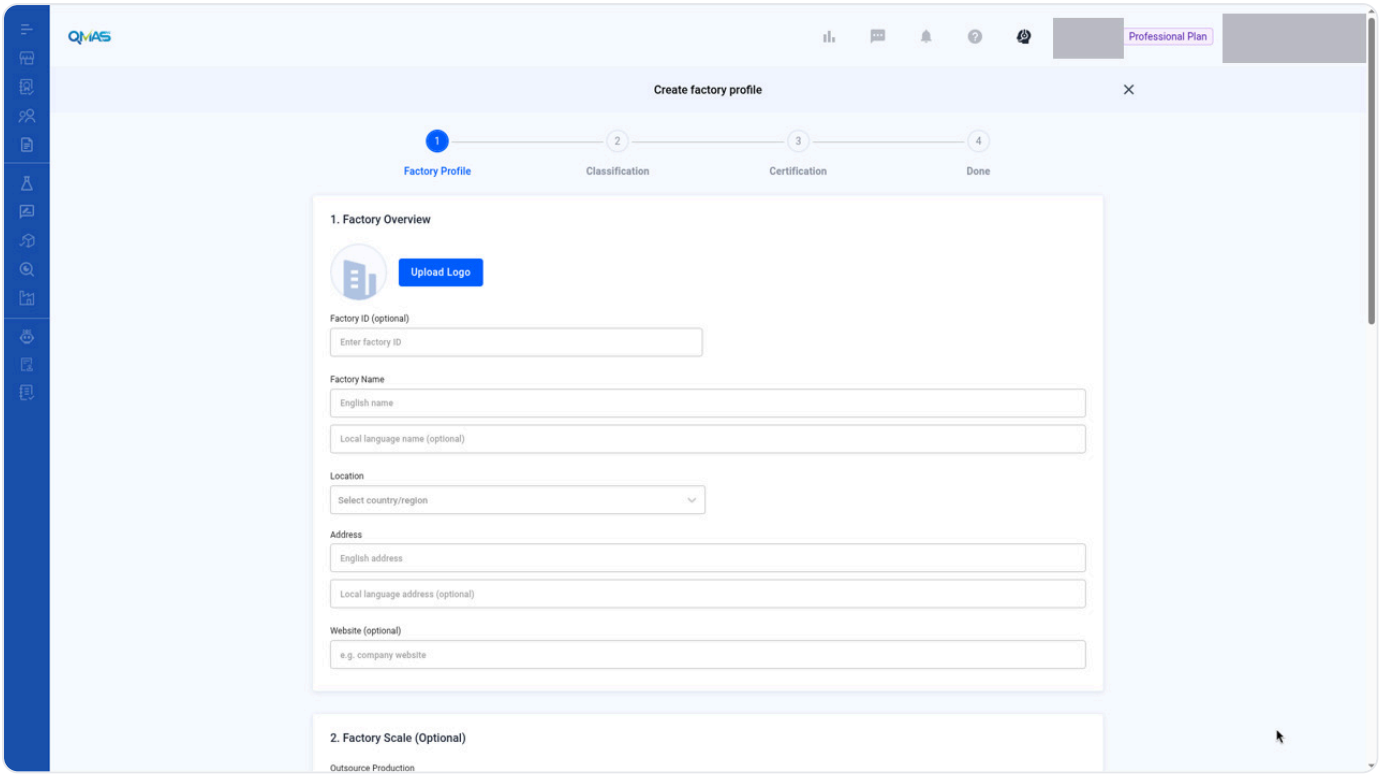

Click **Create Factory**, or **Import Factory** to add many factories from a file.

Factory tab with Import Factory and Create Factory.

2. Factory Profile — overview

- **Upload Logo** and **Factory ID** (optional).
- **Factory Name**: English name (required) and local-language name (optional).
- **Location**: country or region, then province and city.
- **Address**: English address (required) and local-language address (optional).
- **Website** (optional).

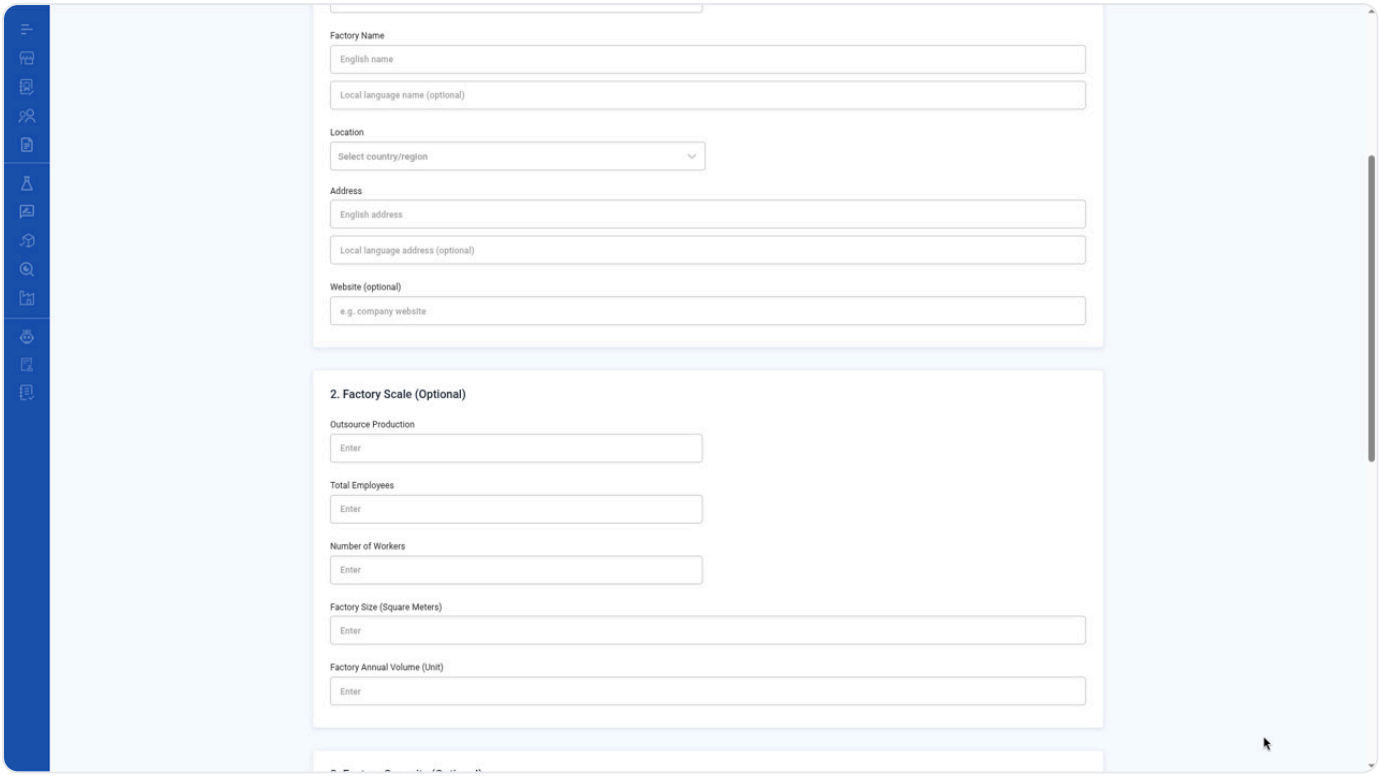

Create factory profile — step 1, Factory Overview.

3. Factory Profile — scale and equipment (optional)

Factory Scale: outsource production, total employees, number of workers, factory size (square meters) and annual volume.

The equipment section lists machines and **Automation Production Line** entries: machine name, brand and model no., quantity and monthly production volume. Click **Add** for more rows.

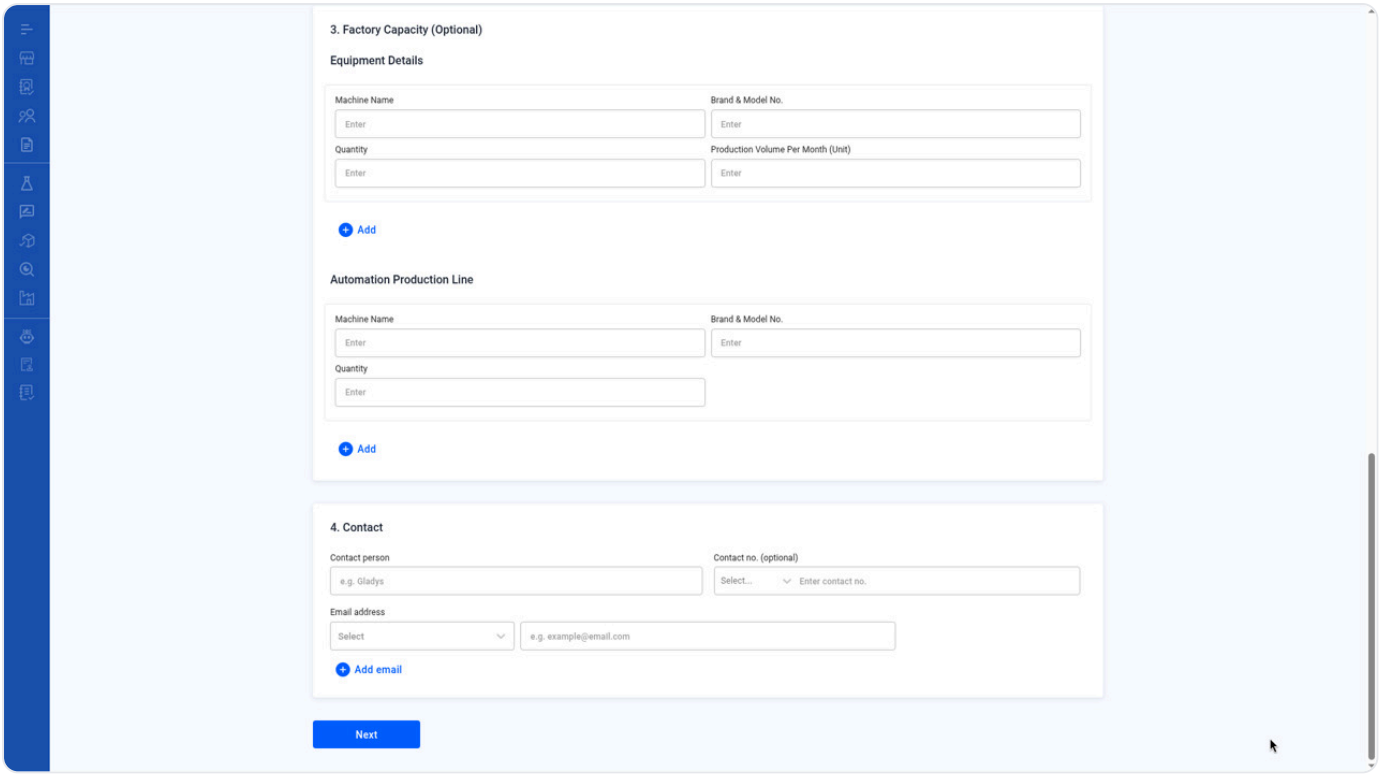

2. Factory Scale (optional).

Scrolled view. Factory Scale is fully visible. Lower Factory Overview fields are blank placeholders, and a sliver of 3. Factory Capacity is also in frame.

4. Factory Profile — contact

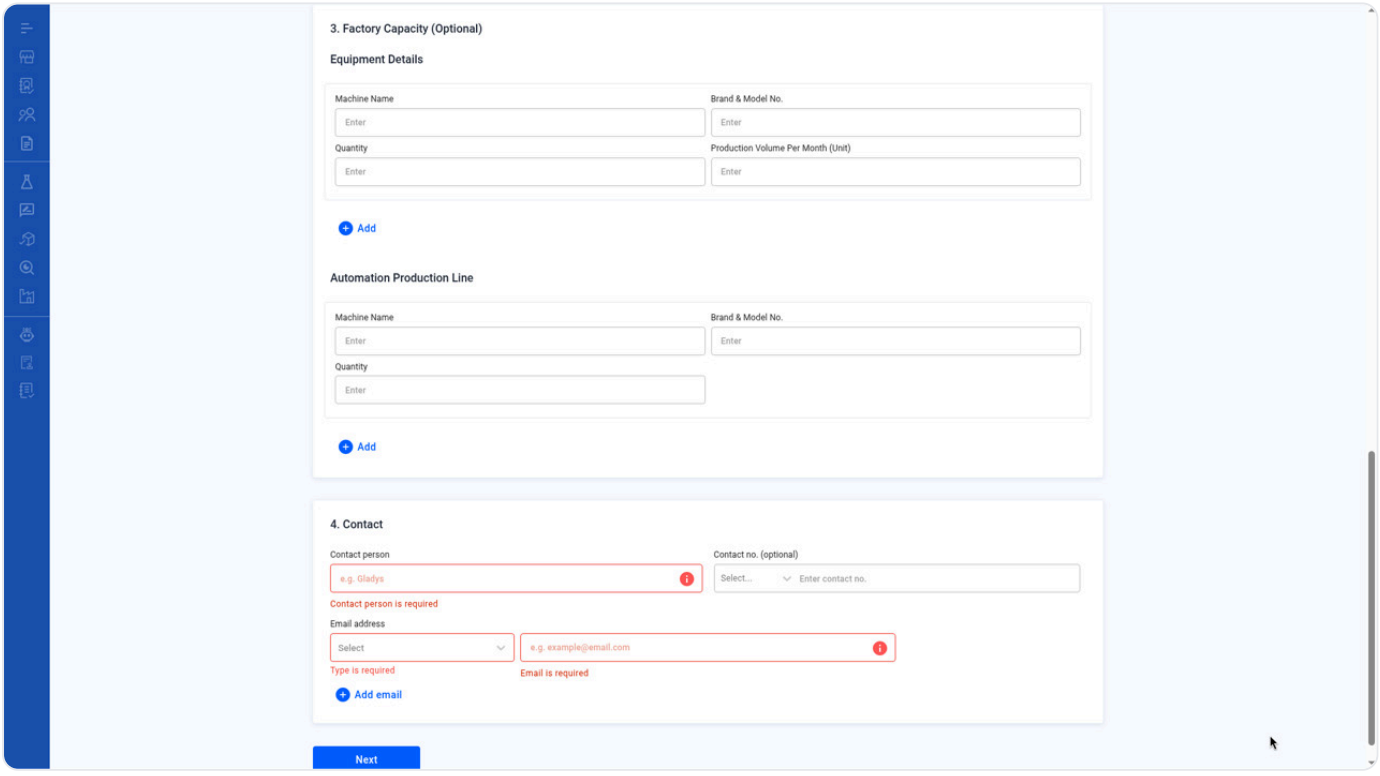

Under **4. Contact**, fill in the **Contact person** and an **Email address** with its type (Company, QA, Sales or Other). **Contact no.** is optional. Click **Next**.

Contact section and Next.

Scrolled view. 3. Factory Capacity is blank and visible above 4. Contact and Next.

If Contact person or the email type and address are empty, **Next** (not Submit) marks them required. The fields stay on example placeholders.

Factory create-profile required-field validation after Next (not Submit): Contact person, email type and email address.

Supplementary screenshot. It is not one of the 98 published inventory slots. Same scrolled Contact view as the previous image, after Next.

5. Classification (optional)

Click **Select category** for the product categories this factory makes, and **Select tag** for your own tags. Click **Next**.

> **Image pending privacy review**
>
> File name: `05-step2-classification.jpg`
>
> Reviewed replacement image not available yet. Follow the written steps above.

Step 2 Classification.

6. Certification (optional)

Click **Add** to attach an audit report or certificate. In **Add Certification**, choose the certification type, upload the file (JPG, JPEG, PNG, PDF, DOC or XLS), and fill in the score or overall rating, issue party, issue date and expiry date. Click **Add**.

> **Image pending privacy review**
>
> File name: `07-add-certification.jpg`
>
> Reviewed replacement image not available yet. Follow the written steps above.

Add Certification pop-up.

Click **Done** to create the factory.

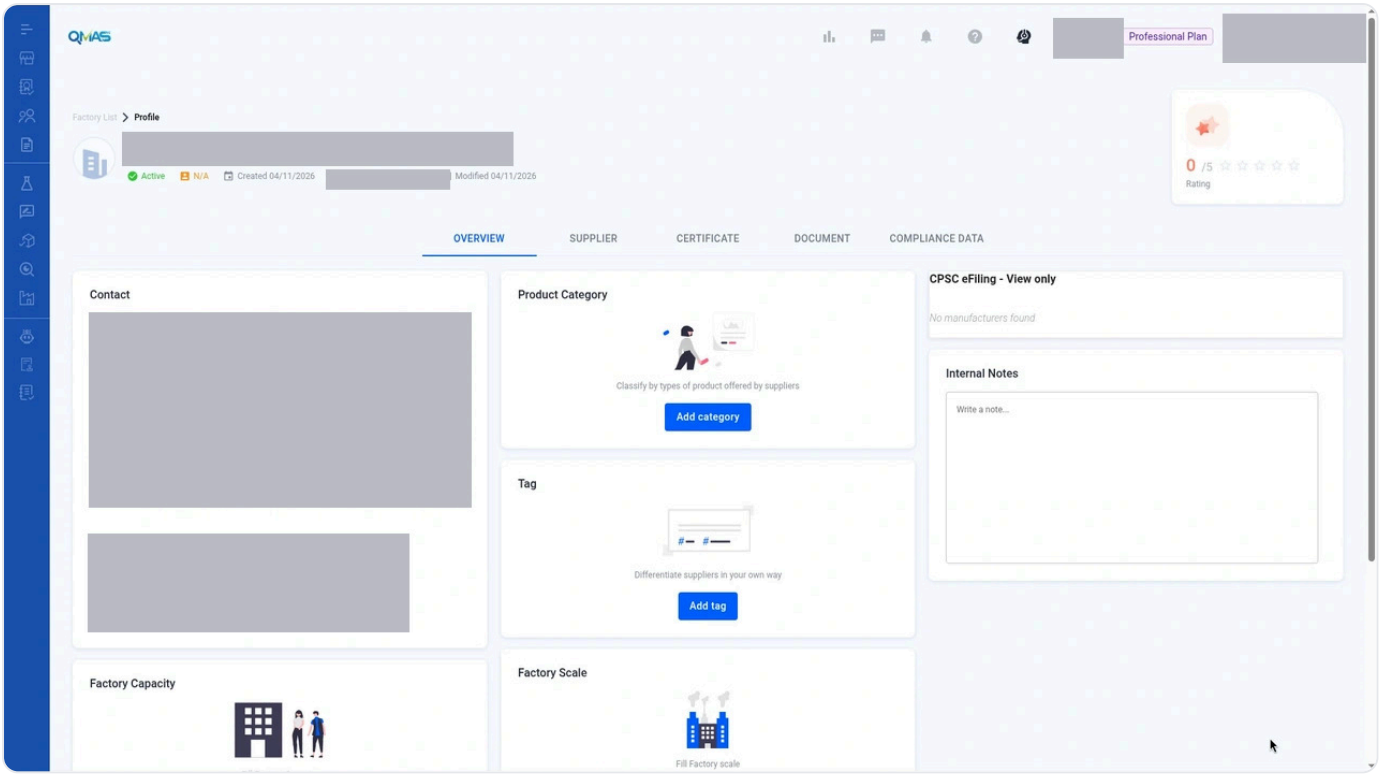

> **Image pending privacy review**
>
> File name: `06-step3-certification.jpg`
>
> Reviewed replacement image not available yet. Follow the written steps above.

Step 3 Certification.

7. Done — factory profile

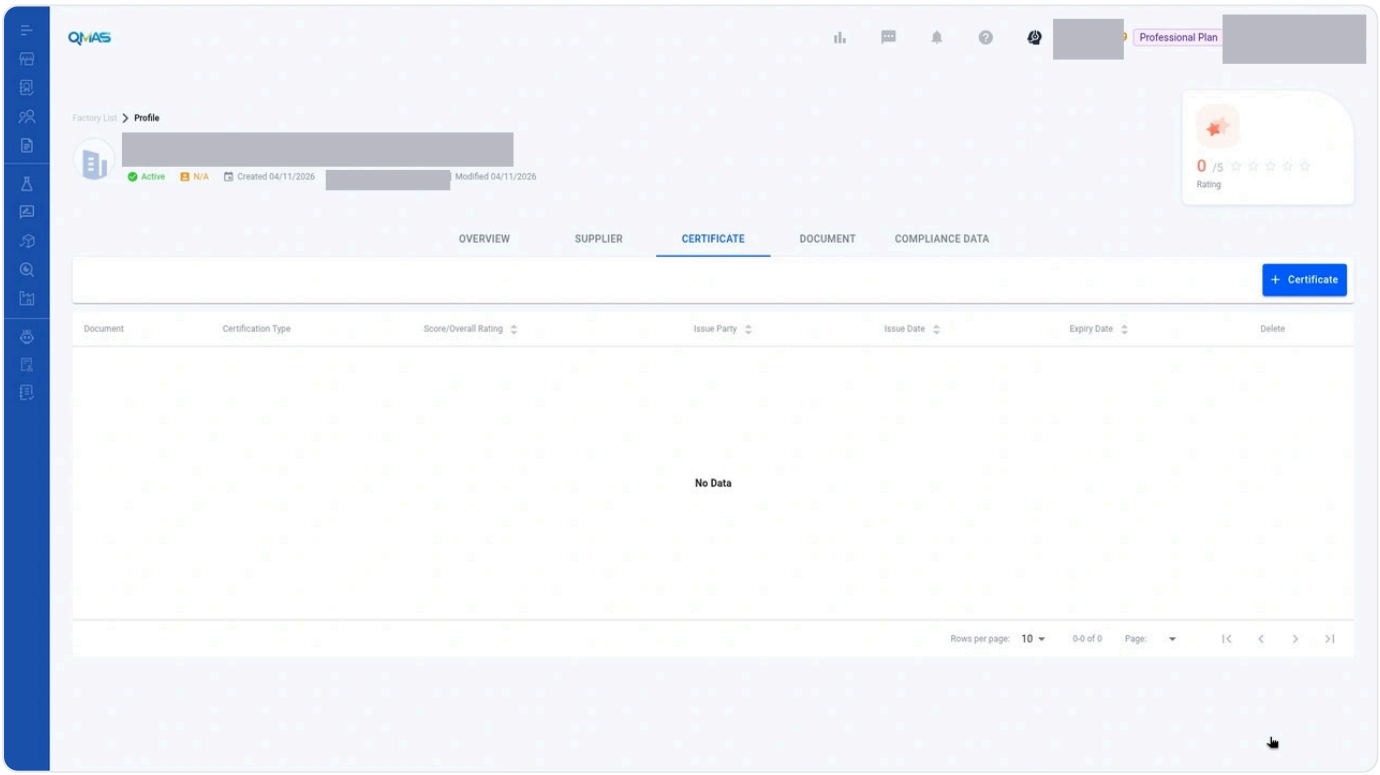

QMAS shows “Create factory successfully!” and opens the factory profile. Use the tabs **Overview**, **Supplier**, **Certificate**, **Document** and **Compliance Data** to manage what is linked to this factory.

The reviewed screenshot is a readonly Overview of an existing profile. Product Category, Tag, Factory Capacity and Factory Scale are empty. It is not the Add Certification pop-up, and no record was written for this shot.

Factory profile — Overview tab.

Readonly Overview. Category, Tag, Capacity and Scale are empty. Created and Modified dates stay visible. This is a 1280×800 desktop crop (1280×714), not a high-resolution screenshot.

Factory profile — Certificate tab, empty (No Data).

Supplementary screenshot, not one of the 98 inventory slots. Genuine empty Certificate tab on the same profile. This is not Step 3 Certification or the Add Certification pop-up. No record was created or changed.

Tips

> Set the expiry date on audit certificates so you can see when they need renewing.

FAQ

How do I create a new factory?

Go to Supplier / Factory Management, click the Factory tab, then Create Factory. Fill in Factory Profile, then Next, Next and Done. Direct link: https://qmas.icw.io/supplier-manager/factory/create

Can I add many factories at once?

Yes. Click Import Factory on the Factory tab.

Where do I upload a factory audit certificate?

In step 3 Certification of Create Factory, or later from the Certificate tab of the factory profile.

Help Center additions and remaining gaps

This section adds Help Center material and named gaps. It does not replace the steps above.

How these labels are used

- **Source-documented** — written in the original Help Center. The last-edited date is given. That does not by itself prove the current QMAS UI.
- **Dev-verified** — confirmed on qmas-dev.icw.io during guide work.
- **Gap** — named as missing or too thin. Not current behaviour until checked on dev.

Reviewed screenshots remain 56 of 98. Forty-two inventory slots are still pending. Six supplementary images are not part of the 98. Unreviewed screenshots were not copied.

Source-documented — edit, documents, and import (last edited 2026-01-16)

Source: Manage your QMAS Factory Compliance Profile, https://app.notion.com/p/2ea9c62c39fc80198eddc3c9e7d20007. Not marked “Updated November 2026”. Labels need a dev check.

Edit company and contact information with the icon next to each section. Edit categories and tags with the pen icon.

Add rating uses the same four dimensions as suppliers in the Help Center (Responsiveness, Quality, Pricing, Market Awareness). Confirm whether a factory rating still exists and still uses these labels.

Internal notes. Add missed certificates or documents later in the **CERTIFICATE** and **DOCUMENT** sections.

The Help Center text has typographical errors (“thisfactory”, “factyory”). Those are not UI labels.

Import Factory: click **Import Factory**, then **Download here** for the factory template, fill it in (the article says create, update, and delete are supported), upload, and click **Next**. A toast confirms completion. One Help Center step title still says “Upload the filled **supplier** template”. Treat that as a source typo unless dev shows that exact wording.

Do not blanket-replace “supplier” wording on Factory screens. A filed bug asks for a context-by-context check.

Remaining gaps

- Profile tabs Supplier, Certificate, Document, and Compliance Data are named, not walked through.
- Overview Product Category and Tag empty-state wording.
- List filters, Export, and the row toolbar.
- Screenshots for import, rating, notes, and tabs other than Overview.

Help Center reconciliation 2026-11-13 (HKT). Original Help Center not edited. No Dify upload.

> Published QMAS User Guide.
>
> Byte copy of the repository-root logo.png. It is the QMAS wordmark with the check through the M, the same mark visible in reviewed QMAS screenshots such as the supplier list header. The root guide labels the slot Company Logo. No license text is stored next to the file. It is not a generated wordmark and it is not a WBA or ICW logo. No higher-resolution official file is in this repository, so the header uses these native 60 by 24 pixels.
